

Netflix Business Case Study — Data Exploration & Visualization

Executive Summary

Total titles: 8807

Movies: 6131

TV Shows: 2676

Release year range: 1925 to 2021

Added year range (date_added): 2008 to 2021

Top countries by title count (top 10):

- United States: 3690
- India: 1046
- United Kingdom: 806
- Canada: 445
- France: 393
- Japan: 318
- Spain: 232
- South Korea: 231
- Germany: 226
- Mexico: 169

Top primary genres (top 10):

- Dramas: 1600
- Comedies: 1210
- Action & Adventure: 859
- Documentaries: 829
- International TV Shows: 774
- Children & Family Movies: 605
- Crime TV Shows: 399
- Kids' TV: 388
- Stand-Up Comedy: 334
- Horror Movies: 275

Top directors (sample):

- Rajiv Chilaka: 22
- Jan Suter: 21
- Raúl Campos: 19

- Suhas Kadav: 16
- Marcus Raboy: 16
- Jay Karas: 15
- Cathy Garcia-Molina: 13
- Jay Chapman: 12
- Youssef Chahine: 12
- Martin Scorsese: 12

Top actors (sample):

- Anupam Kher: 43
- Shah Rukh Khan: 35
- Julie Teiwani: 33
- Naseeruddin Shah: 32
- Takahiro Sakurai: 32
- Rupa Bhimani: 31
- Akshay Kumar: 30
- Om Puri: 30
- Yuki Kaji: 29
- Paresh Rawal: 28

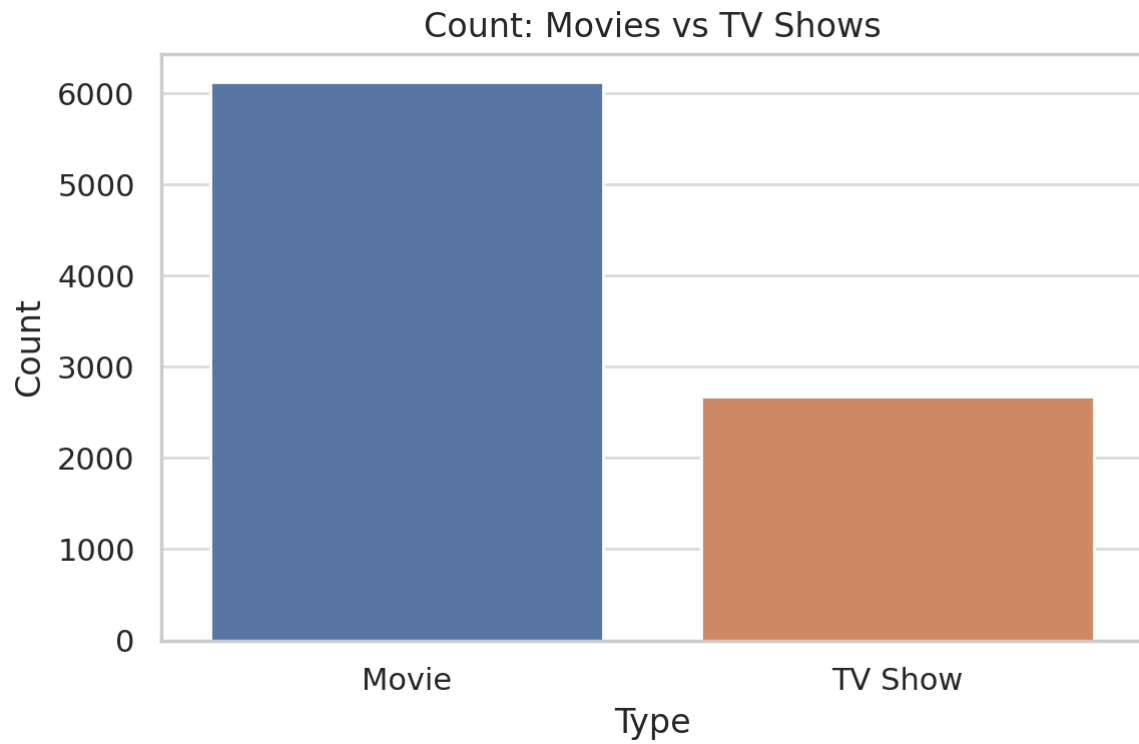

Figure 1: Count of Movies vs TV Shows — useful to observe catalog balance between formats.

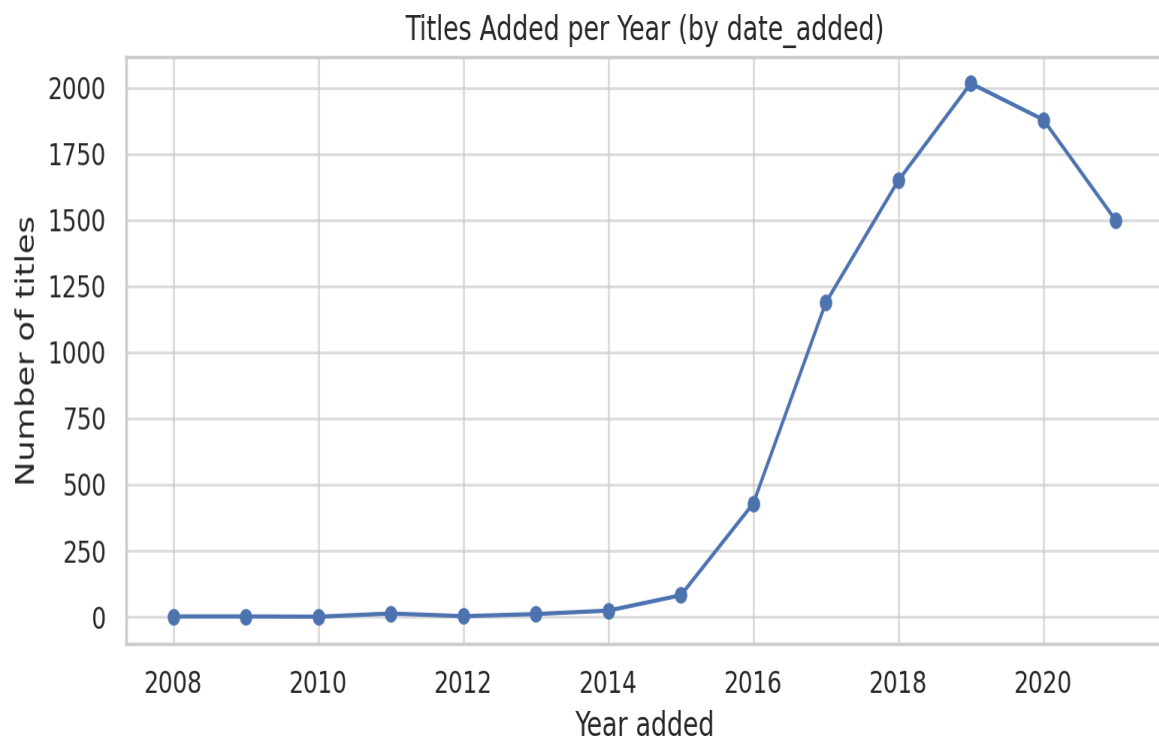

Figure 2: Titles Added per Year — shows growth in content additions over time.

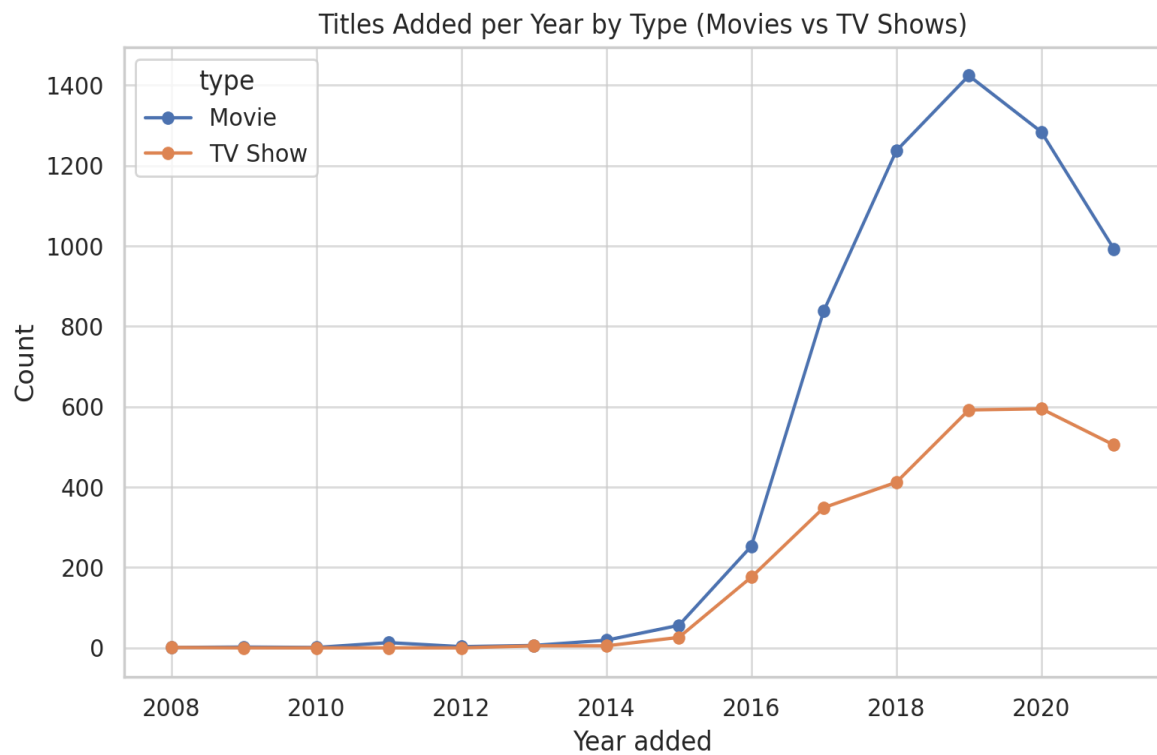

Figure 3: Titles Added per Year by Type — compare production focus on Movies vs TV Shows.

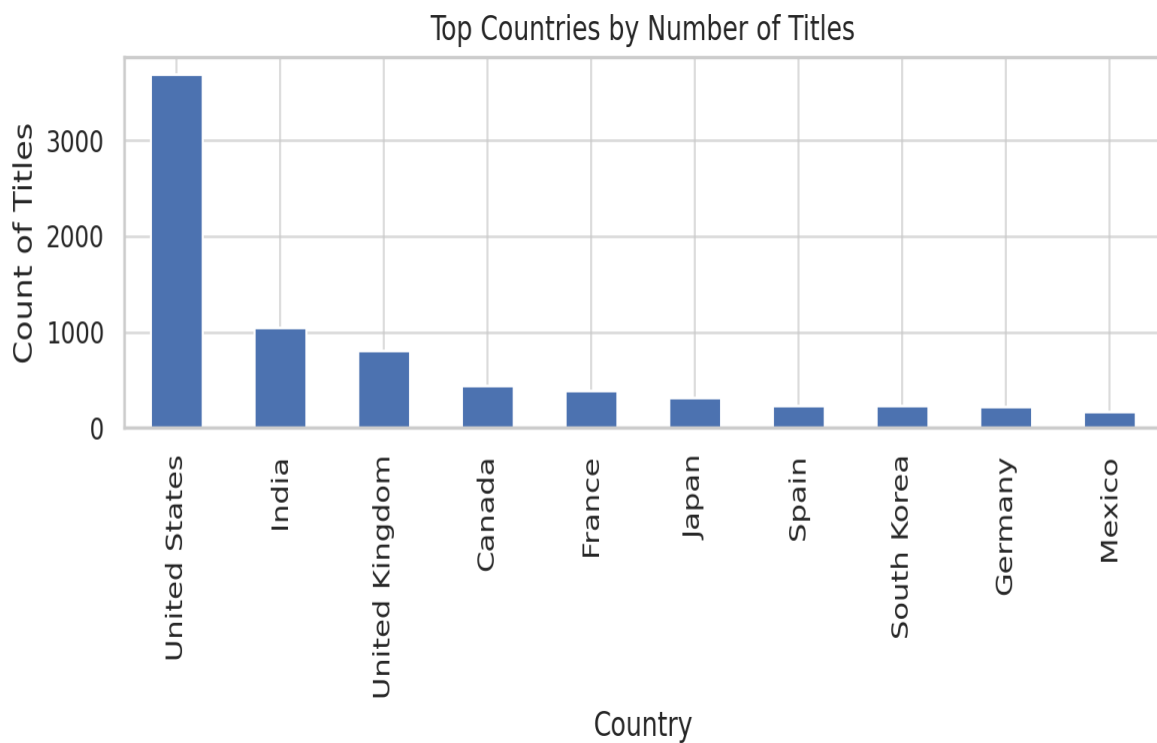

Figure 4: Top Countries by Number of Titles — indicates countries producing the most content in the catalog.

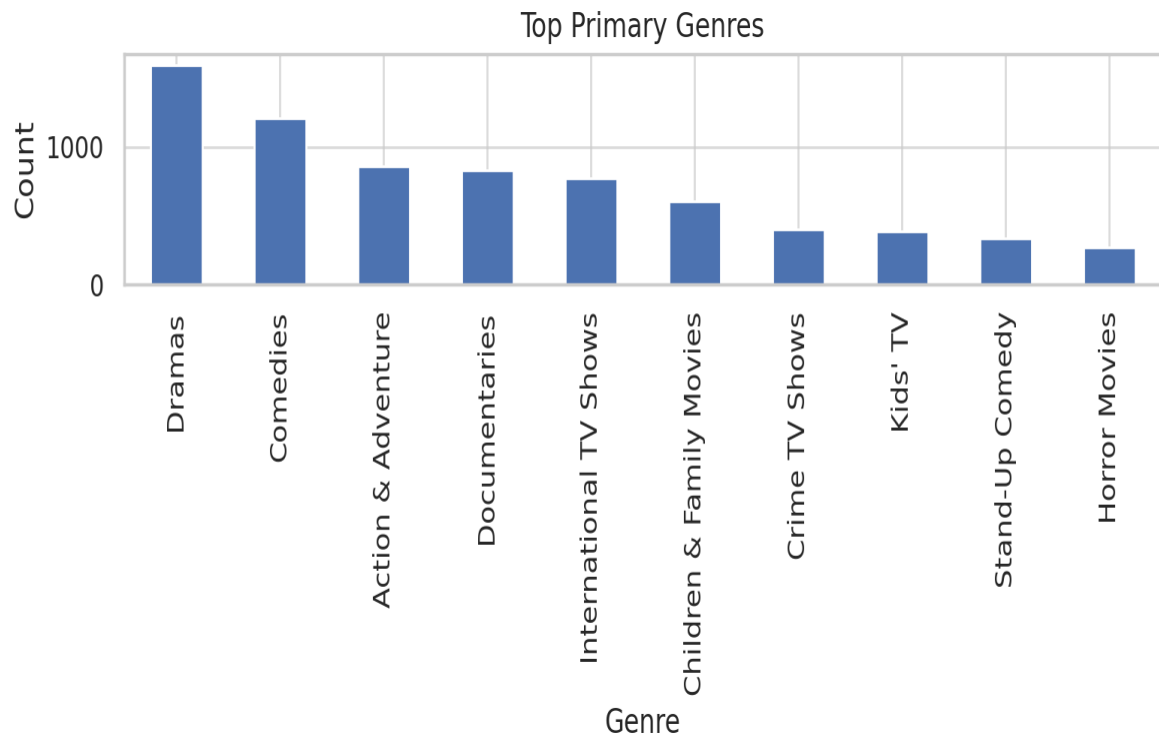

Figure 5: Top Primary Genres — shows genre concentration.

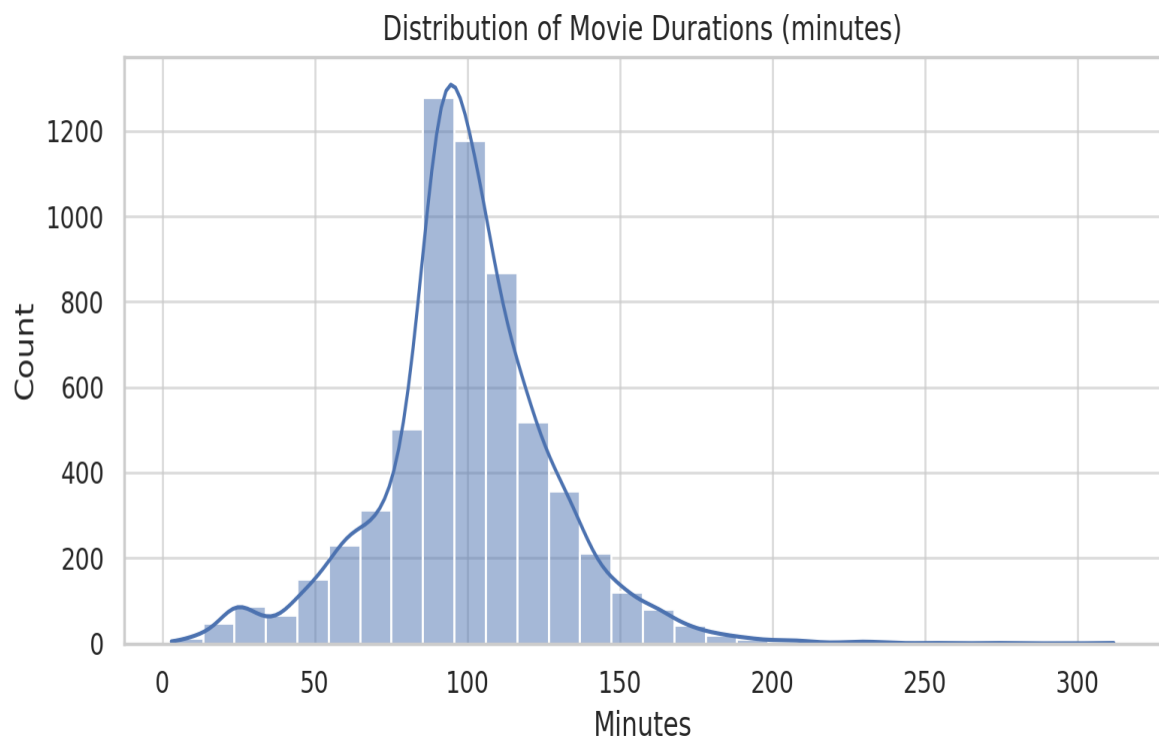

Figure 6: Distribution of Movie Durations — helps with runtime planning.

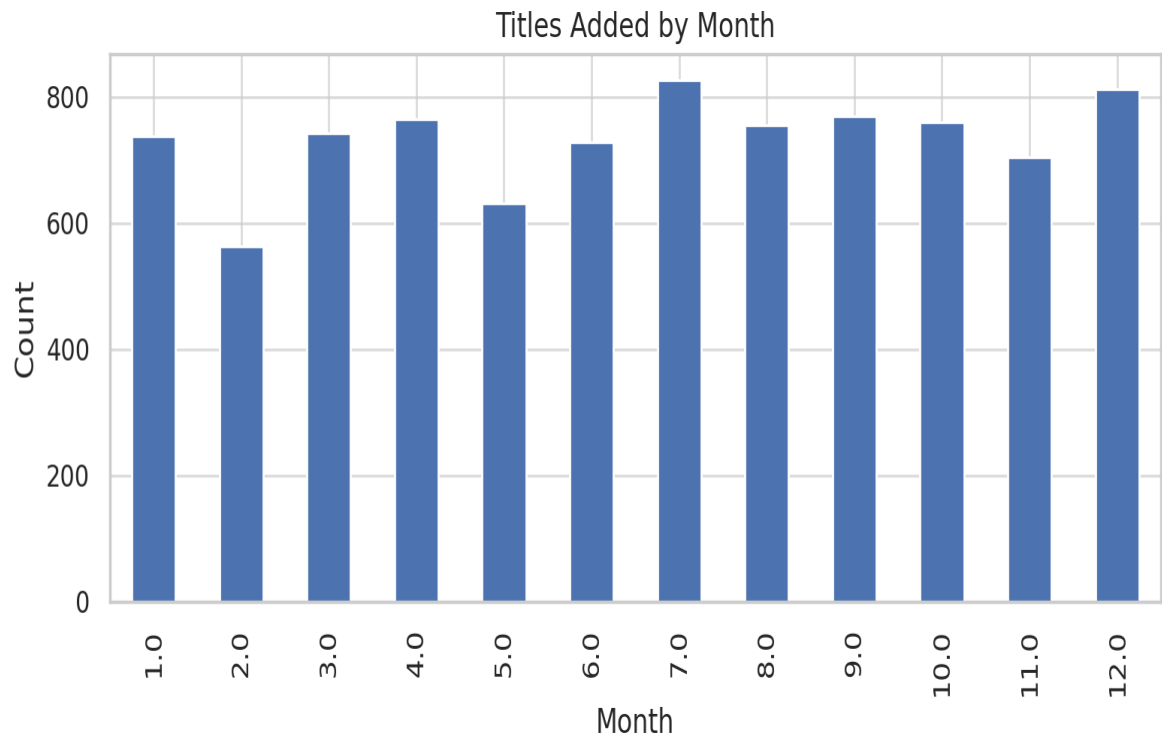

Figure 7: Titles Added by Month — reveals seasonality for launch planning.

Insights & Business Recommendations

1. Observed a mix of Movies and TV Shows; check Figure 1 for exact proportions. Monitoring this balance helps decide investment allocation.
2. Titles added per year (Figure 2) show how content production/insertion changed over time; rising TV shows in Figure 3 indicate a strategic shift toward episodic content.
3. Top countries (Figure 4) demonstrate strong production from key markets; expanding local-language production in underrepresented but high-growth markets can drive subscriptions.
4. Genre concentration (Figure 5) shows high counts in Drama and related genres; consider diversifying into underserved genres per market.
5. Seasonality (Figure 7) suggests Oct–Dec and summer months are strong windows for adding titles — plan tentpole releases accordingly.
6. Runtime distributions (Figures 6 & 8) allow tailoring episode lengths for regional preferences.

Recommendations (Actionable)

- A. Increase investment in local-language serialized dramas (8–12 episodes) in fast-growing markets like India and Brazil to improve retention.
- B. Allocate more budget to TV series production where data shows TV additions outpacing movies — episodic content helps retention.
- C. Schedule major releases in Oct–Dec and regional summer windows, and run marketing 2 weeks prior to launch.
- D. Partner with repeat high-performing directors/actors to build franchise IP and spin-offs.
- E. Expand documentary & short-form series for niche audiences to capture long-tail viewership at lower production costs.

Appendix: Notes & Methods

Data preprocessing: parsed 'date_added', extracted 'added_year' and 'added_month', parsed 'duration' into numeric minutes or seasons.

Exploded comma-separated fields (country, cast, director) to analyze counts per entity.

Plots generated with matplotlib/seaborn; images embedded into this PDF.

This report is derived entirely from the provided dataset and contains actionable business recommendations based on observed patterns.
